4 Switching on and off by quick start button

“Quick start” function enables heating or ventilation by simply pressing the button. Operation time, temperature and heating mode can be preset in the settings in menu item “Setting the quick start”.

- Press quick start button (5).
Heating/ventilation starts functioning.
Quick start button shows green light (heating)/ blue light (ventilation).
- By pressing quick start button (5) heating or ventilation can be ended prematurely at any moment.

5 Switching on and off through the menu

Switching on the heating through the menu

- ✓ Heating menu has been selected in the main menu.
 - ▶ Press the control knob (6).
The operation mode, required temperature or operation time must be set in accordance to installed heater. Follow the instructions displayed in the menu.
 - You can select the setting by turning the control knob. You confirm selection by pressing the control knob.
- The heating starts functioning as soon as all the settings have been chosen.
- By pressing quick start button (5) heating can be ended prematurely at any moment.

Setting ventilation through the main menu

- ✓ Ventilation menu has been selected in the main menu.
 - ▶ Press the control knob (6).
The fan speed and/or operation time must be set in accordance to the installed heater. Follow the instructions displayed in the menu.
 - You can select the setting by turning the control knob. You confirm selection by pressing the control knob.
- The ventilation starts functioning as soon as all the settings have been chosen.
- By pressing quick start button (5) during functioning, ventilation can be ended prematurely at any moment.

6 Function of timer

This function is available only for control element of MultiControl.

- ✓ Timer menu has been selected in the main menu.
 - ▶ Press the control knob (6).
 “Add timer” message (if no timer has been saved yet) appears in the display.
 - ▶ Press the control knob in order to add new timer.
- In order to programme timer you should enter the desired day of the week and switch-on and switch-off time. Follow the instructions displayed in the menu.

As soon as settings are entered, the programmed timer is saved and shown in the display.

- ▶ Press the control knob in order to activate the programmed timer.

“Activate” message appears in the display.

- ▶ Press the control knob in order to confirm activation.

All programmed times can be deactivated, edited or removed. If other “Timer” symbol has been selected in the main menu, all saved timers appear in the display in the chronological order. The following functions are at the disposal after selecting the desired timer: “activate”, “deactivate”, “edit” and “delete”.

7 Important Information on Operating and Installation Instructions

Important Information (not complete)

Installation / Repair

The improper installation or repair of Webasto heating and cooling systems can cause fire or the leakage of deadly carbon monoxide. This can lead to serious injury or death.

To install and repair Webasto heating and cooling systems you need to have completed a Webasto training course and have the appropriate technical documentation, special tools and special equipment.

Installation and repair may ONLY be carried out by persons trained and certified in a Webasto training course. NEVER try to install or repair Webasto heating or cooling systems if you have not completed a Webasto training course, you do not have the necessary technical skills and you do not have the technical documentation, tools and equipment available to ensure that you can complete the installation and repair work properly.

Only use genuine Webasto parts. See the Webasto air and water heaters accessories catalogue for this purpose.

Operation

Do not operate the heater in closed rooms due to the danger of poisoning and suffocation.

Always switch off the heater before refuelling.

Please note

ALWAYS follow all Webasto installation and operating instructions and observe all warnings.

To become familiar with and understand all functions and properties of the heater, the operat-

ing instructions must be read carefully and observed at all times. You will find the operating instructions on the included DVD.

Should you not be able to access the operating instructions on the DVD, you will also receive the operating instructions in printed form directly from Webasto on request. Please contact the Webasto Service Centre for this purpose (see the brochure with the service phone numbers of the respective subsidiaries).

For proper, safe installation and repair work, the installation instructions with all warnings and safety information must be carefully read and observed at all times. Please always contact a workshop authorised by Webasto for all installation and repair work. You will find the general installation instructions with all warnings and safety information on the included DVD or for authorised workshops at <http://dealers.webasto.com>.

IMPORTANT

The instructions in this document are not complete and do not replace the detailed installation, repair and operating instructions on the included DVD or at (<http://dealers.webasto.com>) from Webasto and from the vehicle manufacturer.

Webasto shall assume no liability for defects, damage and injuries resulting from a failure to observe the installation, repair and operating instructions of the information contained in them. This liability exclusion particularly applies to improper installations and repairs, installations and repairs by untrained persons or in the case of a failure to use genuine spare parts.

The liability due to culpable disregard to life, limb or health and due to damage or injuries caused by a wilful or reckless breach of duty remain unaffected, as does the obligatory product liability.

8 Statutory regulations governing installation

Directives

EMC Directive (ECE-R 10)

Type-approval numbers for MultiControl/SmartControl

E1 10 R - 047319

MultiControl/SmartControl

NOTE

The regulations of these guidelines are binding in the scope of the Directive 70/156/EEC and/ or 2007/46/EC (for new vehicle models from 29/04/2009) and should also be observed in countries in which there are no special regulations.

IMPORTANT

Failure to follow the installation instructions will result in the invalidation of the type approval for the heater and therefore invalidation of the general homologation of the vehicle.

NOTE

Country-specific registration regulations must be complied with.

In multilingual versions the German language is binding.
