

INSTALLATION INSTRUCTIONS FOR FUEL MARINE FILTER 4110768A

V1.0

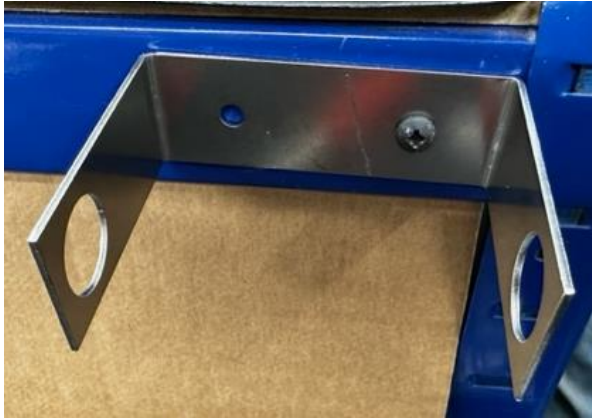

Installation Example:

INSTALLATION STEP 1

Secure your bracket like this to enable the fuel filter to swing.

INSTALLATION STEP 2

Screw the tails into the reducer bolts, ready to be screwed into the fuel filter body.

INSTALLATION STEP 3

Position the fuel filter body in place ready for the tails and bolts to be connected.

INSTALLATION STEP 4

Finally screw the bolt and tails into filter body.

WARNING!

Please make sure when you push the marine rubber hose onto the tails ends, you are very carefully; If too much pressure either side is applied the small tail will break due to its small, reduced size.

OPEN/CLOSE

Turning the knob to the **Z** position will close the valve and turning it to **A** will open enabling fuel to flow through the filter.
