

2017 VW CRAFTER FUEL PICK-UP INSTRUCTIONS 29.2180.01.0370

1. The fuel tank will need to be removed to access the sender unit.

Cut the tip of the dome off, and deburr to reveal a hole in the auxiliary fuel supply port.

Connect the larger stepped rubber fuel hose to the plastic auxiliary fuel supply port elbow, using 12mm fuel pipe clip.

Insert the blue fuel pipe into the smaller hole and secure with a 10mm clip.

Route the remainder to the fuel metering pump, cut to length using a sharp knife or pipe cutter. Connect in the normal manner.
